Because forward-looking statements involve risks and uncertainties, there are many factors that could cause our actual results, performance or achievements to differ materially from those expressed or implied by our forward-looking statements. This note contains important cautionary statements of the known factors that we consider could materially affect the accuracy of our forward-looking statements and adversely affect our business, results of operations and financial position. Additionally, many of these risks and uncertainties are currently, and in the future may continue to be, amplified by our substantial debt balance incurred during the pause of our guest cruise operations. There may be additional risks that we consider immaterial or which are unknown. These factors include, but are not limited to, the following:

- Events and conditions around the world, including geopolitical uncertainty, war and other military actions, inflation, higher fuel prices, higher interest rates and other general concerns impacting the ability or desire of people to travel have led, and may in the future lead, to a decline in demand for cruises as well as negative impacts to our operating costs and profitability.
- Pandemics have in the past and may in the future have a significant negative impact on our financial condition and operations.
- Incidents concerning our ships, guests or the cruise industry have in the past and may, in the future, negatively impact the satisfaction of our guests and crew and lead to reputational damage.
- Changes in and non-compliance with laws and regulations under which we operate, such as those relating to health, environment, safety and security, data privacy and protection, anti-money laundering, anti-corruption, economic sanctions, trade protection, labor and employment, and tax may be costly and have in the past and may, in the future, lead to litigation, enforcement actions, fines, penalties and reputational damage.
- Factors associated with climate change, including evolving and increasing regulations, increasing global concern about climate change and the shift in climate conscious consumerism and stakeholder scrutiny, and increasing frequency and/or severity of adverse weather conditions could adversely affect our business.
- Inability to meet or achieve our targets, goals, aspirations, initiatives, and our public statements and disclosures regarding them, including those that are related to sustainability matters, may expose us to risks that may adversely impact our business.
- Breaches in data security and lapses in data privacy as well as disruptions and other damages to our principal offices, information technology operations and system networks and failure to keep pace with developments in technology may adversely impact our business operations, the satisfaction of our guests and crew and may lead to reputational damage.
- The loss of key team members, our inability to recruit or retain qualified shoreside and shipboard team members and increased labor costs could have an adverse effect on our business and results of operations.
- Increases in fuel prices, changes in the types of fuel consumed and availability of fuel supply may adversely impact our scheduled itineraries and costs.
- We rely on supply chain vendors who are integral to the operations of our businesses. These vendors and service providers may be unable to deliver on their commitments, which could negatively impact our business.
- Fluctuations in foreign currency exchange rates may adversely impact our financial results.
- Overcapacity and competition in the cruise and land-based vacation industry may negatively impact our cruise sales, pricing and destination options.
- Inability to implement our shipbuilding programs and ship repairs, maintenance and refurbishments may adversely impact our business operations and the satisfaction of our guests.
- We require a significant amount of cash to service our debt and sustain our operations. Our ability to generate cash depends on many factors, including those beyond our control, and we may not be able to generate cash required to service our debt and sustain our operations.
- Our substantial debt could adversely affect our financial health and operating flexibility.
- The risk factors included in Carnival Corporation's and Carnival plc's Annual Report on Form 10-K filed with the SEC on January 26, 2024 and Carnival Corporation's and Carnival plc's Quarterly Report on Form 10-Q filed with the SEC on March 27, 2024.

The ordering of the risk factors set forth above is not intended to reflect our indication of priority or likelihood.

Forward-looking and other statements in this document may also address our sustainability progress, plans, and goals (including climate change and environmental-related matters). In addition, historical, current, and forward-looking sustainability- and climate-related statements may be based on standards and tools for measuring progress that are still developing, internal controls and processes that continue to evolve, and assumptions and

predictions that are subject to change in the future and may not be generally shared.
