

# EVERY DROP COUNTS

## USE LESS, RECLAIM MORE

### ENCOURAGING CONSERVATION

Water is a precious resource, and we encourage our guests and crew to conserve it while on board through:

- Water efficiency training for crew members
- Regularly upgrading water-efficient appliances and fixtures
- Installing sink aerators and low-flow shower heads
- Offering discretionary towel and sheet reuse programs

### USING WATER EFFICIENTLY ONBOARD

The ocean waves aren't just beautiful backdrops for guest photos — they're also our main source of water:

**89%**

of fresh water sustainably produced on board from seawater

**~38%**

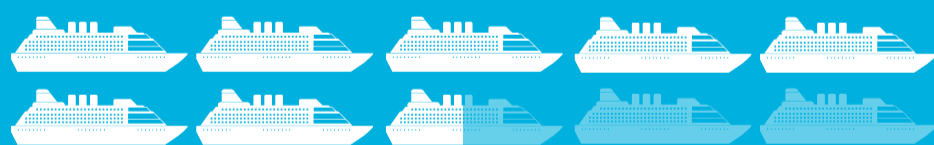

less H<sub>2</sub>O used on board per person per day versus the U.S. national average on land

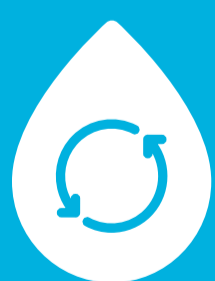

### TREATING AND REUSING WATER RESPONSIBLY

We're purifying and recycling water for easy reuse and safe return to the water cycle:

**~75%**

of our fleet capacity is equipped with Advanced Wastewater Treatment Systems (AWWTS)

**100%** of our Ballast H<sub>2</sub>O (used to stabilize ships at sea) is sanitized before returning to nature
